

PFAS Certified Reference Material for EPA Methods 533 and 537.1

To support U.S. EPA Methods for the determination of per- and polyfluorinated alkyl substances (PFAS) in drinking water, Phenova, a part of Phenomenex, has prepared native mixtures, at the same concentrations, that allow analytical labs to simply dilute the CRM and quickly make their standard curve. In addition, analytes are listed as acids to make calculations easier. The mixtures are technical grade standards that include branched and linear isomers.
